

Webmail in Advanced Mode for Firefox v4.0

Firefox version 4.0 requires a plugin to allow Iomart Webmail to work in advanced mode

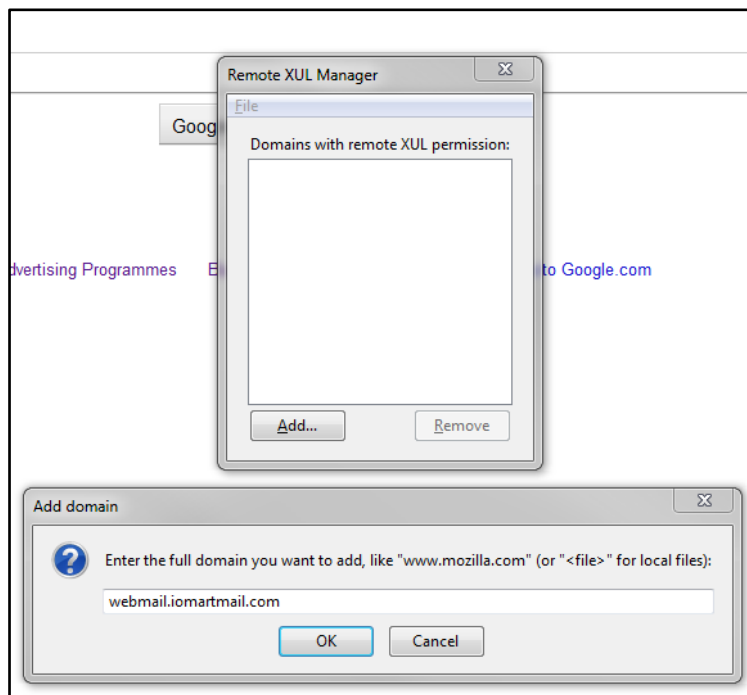

You can download the plugin here –

<https://addons.mozilla.org/en-US/firefox/addon/remote-xul-manager/>

Once the plugin has been installed click on Firefox >> Web Developer >> Remote XUL Manager

Click on Add and add the website Address webmail.iomartmail.com

You should now be able to access Iomart Webmail via advanced login on Firefox version 4.0
